

Indonesia Defence Maritime Newsletter – **Third Edition**

We are pleased to present the third edition of the Indonesia Defence Maritime (IDM) newsletter, highlighting our latest project developments, system installations, and operational milestones. Through this edition, we continue to share our commitment to innovation, technical excellence, and reliable execution across defence maritime operations.

Autopilot System Integration on KP Kutilang and KP Bisma

IDM has successfully achieved a major milestone with the completed installation of the Autopilot System on both KP Kutilang and KP Bisma.

To ensure seamless deployment and operational readiness, the project concluded with a comprehensive phase that included thorough installation inspections, dedicated operator training for the crew, and rigorous sea trials.

Ongoing Autopilot Installation on KP Yudistira and KP Baladewa

Building on our current momentum, IDM is actively progressing with the installation of autopilot systems on KP Yudistira and KP Baladewa. The ongoing activities focus on hardware integration, interface configuration, and preliminary technical alignments tailored to each vessel's specific operational requirements.
